

# MUHAMMED FAHAD N

Kochi,kerala • 7306888865 • mhdfahad53@gmail.com

## SUMMARY

SoftwareEngineer with 2.5 years of experience in designing, developing, and deploying robust web applications. Proficient in MERN stack, NestJS, Prisma, and Next.js, with hands-on expertise in SQL/NoSQL databases, API development, and modern deployment pipelines. Skilled in requirement analysis, test case preparation, and software quality assurance, and adept at collaborating in agile teams to deliver scalable, high-performance solutions aligned with business objectives.

## WORK EXPERIENCE

SoftwareEngineer, Bluecast Technologies

February 2024 - Present

- Contributed to all phases of the development lifecycle, from client meetings to code delivery.
- Developed scalable, maintainable software solutions, adhering to best coding practices.
- Collaborated with cross-functional teams to troubleshoot and optimize systems.
- Worked with diverse technologies, staying current with industry trends

Intern, Luminar Technologies

May 2023 - Dec 2023

- Gained hands-on experience in full-stack web development using the MERN stack.
- Built real-world projects, enhancing both frontend and backend skills.
- Learned project collaboration and teamwork in a fast-paced environment

## SKILLS

- |                        |                   |                     |
|------------------------|-------------------|---------------------|
| ▪ HTML                 | ▪ React Hook Form | ▪ Prisma            |
| ▪ CSS                  | ▪ Next.js         | ▪ Git/GitHub        |
| ▪ Tailwind CSS         | ▪ Microfrontend   | ▪ Socket            |
| ▪ Mantine UI           | ▪ MongoDB         | ▪ FCM               |
| ▪ Shadcn UI            | ▪ NoSQL           | ▪ Microservices     |
| ▪ Material UI          | ▪ SQL             | ▪ Deployment(CI/CD) |
| ▪ Bootstrap            | ▪ Node.js         | ▪ gRPC              |
| ▪ JavaScript           | ▪ Express.js      | ▪ Angular           |
| ▪ TypeScript           | ▪ TypeORM         |                     |
| ▪ React                | ▪ Nestjs          |                     |
| ▪ TanStack React Query | ▪ Fastify         |                     |

# PROJECTS

**CRM Management System Technologies: Mantine UI, Tailwind CSS,Next.js, NestJS, TypeORM, PostgreSQL, TanStack React Query**

A comprehensive platform with WhatsApp, Instagram, and Email integration for managing leads and support tickets, streamlining workflows, and scheduling customer communication through an intuitive interface.

**Personal Finance & Investment Management System**  
**Technologies: Shadcn UI ,Tailwind CSS,Nextjs,Prisma,uploadthing,TanStack react query**

The Personal Finance & Investment Management System is a modern and intuitive platform designed to help individuals and businesses track expenses, manage investments, and make data-driven financial decisions. The system provides a seamless user experience with real-time insights, budget planning, and portfolio management, enabling users to achieve financial stability and growth.

**Doctor-Patient Questionnaire & Attending System Technologies: Shadcn UI ,Tailwind CSS, Nextjs,TanStack react query**

The Doctor-Patient Questionnaire & Attending System is a digital platform designed to streamline patient consultations by collecting pre-appointment medical information through interactive questionnaires. It helps doctors make informed decisions by analyzing patient responses and providing an efficient attending system for developed healthcare management.

**Workmen Productivity Management**  
**Technologies: Shadcn UI, Tailwind CSS,Next.js, TanStack React Query, Prisma**

A comprehensive platform for task assignment, allocation, and status updates, built using Microfrontend and Microservice architectures. It allows managers to assign tasks to workers, track progress, and update task statuses efficiently. The system also supports multi-language translation, ensuring clear communication across diverse teams and improving overall operational efficiency.

**VIWO - Virtual Work Force**  
**Technologies: Shadcn UI, Tailwind CSS,Next.js, TanStack React Query, Python**

This project is built to let users complete various tasks through a chat-based agent. The agent reads the user’s messages, understands the required action, and calls the appropriate APIs to perform tasks such as searching, updating, creating, or completing workflows. Any process – like bookings, payments, or reservations – can be done interactively through simple conversation.

---

# EDUCATION

**Gems ASC College,Ramapuram**  
Bachelor of Computer Applications  
University of Calicut, Graduated in 2023

**Higher Secondary Education (Plus Two)**  
GMHSS Perinthalmanna,
